Internet Home Banking leader expands compatibility to three new CU Data Processors

BOISE, ID (Nov 6, 2002) - HomeCU.com, a division of Database Management Services Inc. (DMS) and one of the fastest growing Internet Home Banking solutions for Credit Unions, introduced today the compatibility of HomeCU.com with three new Data Processing Vendors Symitar, BCG, and CMC Flex. HomeCU.com focuses on Credit Union Internet Home Banking, exclusively for Credit Unions.

"We're very pleased with the response we've received since expanding our compatibility to three additional Data Processors," said HomeCU's VP Jan Brinkerhoff. "Our customers know they can count on us for ease of implementation and excellent support. The three additional "Batch" interfaces takes total compatible DP vendors to 14, allowing us to meet the needs of Credit Unions member services nationwide."

The HomeCU.com Internet Home Banking Solution provides 24X7 Credit Union member account access and has a client retention rate of 100% since 1996. HomeCU.com provides Credit Unions value added services with Internet Home Banking access starting at a flat rate of \$300/month. HomeCU.com is highly secure and Credit Union proven since 1996.

HomeCU., is one of the leading providers of Enterprise Internet Home Banking solutions utilized by small Credit Unions. To learn more about HomeCU.com, visit its web site at www.HomeCU.com.
