DMS, Inc. Incorporates ISO 17799 Standard.

BOISE, ID (March 27th, 2006) – DMS, Inc, provider of the HomeCU line of Internet home banking solutions to credit unions, announced today it has incorporated within its practice the ISO/IEC 17799 information security standard. The implementation was independently audited and verified by a third party security company, E3 Technology, Inc., based in Spokane, Washington.

"We provide a highly-visible service that is critical to hundreds of credit unions, so information security is paramount," said Joe Pearson, CEO of DMS, Inc.. "Compliance with this standard demonstrates our attention to data security, physical security, and disaster recovery." According to the ISO, the standard "establishes guidelines and general principles for initiating, implementing, maintaining, and improving information security management in an organization."

ISO/IEC 17799 contains the best practices of control objectives and controls in the following areas of information security management:

- a. Security Policy
- b. Organization of Information Security
- c. Asset Management
- d. Human Resources Security
- e. Physical and Environmental Security
- f. Communications and Operations Management
- g. Access Control
- h. Information Systems Acquisition, Development and Maintenance
- i. Information Security Incident Management
- j. Business Continuity Management
- k. Compliance

DMS, Inc. provides HomeCU, the innovative home banking solution developed exclusively for credit unions and proven since 1996. Currently, more than 300 credit unions in 44 states use HomeCU. Full-featured, secure, and cost-effective, HomeCU integrates securely with 18 different data processing systems, and 23 check image vendors. Additional information and a live demo are available at www.homecu.com.
