HomeCU provides three bill pay vendor choices

BOISE, ID (July 8th, 2005) – Database Management Services, Inc., announced today that its HomeCU Internet home banking service now integrates with three bill pay vendors that credit unions can choose from: Mid-Atlantic Corporate, IPAY, and ORCC. The popular “trusted access” or “cross-authentication” allows members to automatically login to the bill pay with a single sign-on from the HomeCU home banking service.

“The reasons for choosing a bill pay service vary widely among credit unions,” notes Joe Pearson, President of DMS. “We feel the credit union is best positioned to evaluate bill pay providers and we integrate with their choice at no charge.”

HomeCU is the innovative home banking solution developed exclusively for credit unions and proven since 1996. Currently, more than 280 credit unions in 44 states use HomeCU. Full-featured, secure, and cost-effective, HomeCU integrates securely with 18 different data processing systems, and 23 check image vendors. Additional information and a live demo are available at www.homecu.com.
